

Center for Artificial Intelligence in Society presents...

Drs. Milind Tambe & Eric Rice

AI for Social Good

How can AI be used for social good? Artificial intelligence has received an enormous amount of attention in the popular press over the past few years. Much of this press is negative, focusing on job loss due to automation or fears of weaponized AI. In this lecture, Drs. Tambe and Rice will share their vision for how AI and social work can come together in the 21st century to tackle some of the world's most vexing social issues. They will discuss how they created the USC Center for Artificial Intelligence in Society and its mission; and will share some of CAIS' main areas of research, including homelessness, suicide prevention, substance abuse prevention, gang violence prevention, wildlife conservation, and counter-terrorism.

Thursday, September 7th, 4-5 p.m.

Mudd Hall (MHP) 101

This lecture satisfies requirements for CSCI 591: Research Colloquium.

Drs. Milind Tambe (left) and Eric Rice are the co-directors and co-founders of USC CAIS. Dr. Tambe is the Helen N. and Emmett H. Jones Professor in Viterbi School of Engineering and Dr. Rice is an associate professor in the Suzanne Dworak-Peck School of Social Work.
